

## SEEKING A POSITION IN SOFTWARE DEVELOPMENT LEADERSHIP

### SOFTWARE DEVELOPMENT LEADERSHIP SUMMARY

At my core, I design and develop software and/or facilitate software development excellence by others.

- 20+ years of experience designing and building software products and solutions, managing teams and projects.
- Nearly a decade in progressive management and executive positions in IDI/Open Text.
- Many years of solving problems for enterprise customers as a consultant.
- Skilled team builder, facilitator, member & advisor.
- In-depth understanding and practice competency with both Agile, and older methodologies; including the skills and experience necessary to lead a transformation.
- Understanding of modern DevOps tools and practices and the software architecture and infrastructure necessary to facilitate their success.
- Hands-on full-stack expert for Web, Mobile and Desktop application development.
- Served as the senior software development executive for a staff of ~50 professionals of all disciplines; owning site leadership, fiscal, project, vendor management, and staff development responsibilities, as well as customer escalations.
- Served as the program management executive; coordinating the project activity for 200 development professionals spread across 6 sites in North America and Europe.
- An open, inclusive, highly collaborative and mentoring/coaching style of management.
- Employ a “No Surprises” philosophy where truth is exchanged early and often with subordinates, peers and power.

### RECENT CONSULTING EXPERIENCE

**ECM Innovation, Inc.**

**2006 - Present**

#### **Enterprise Content Management Consulting Services Provider**

- Provided consulting services (Architecture, development, deployment & support) in the Enterprise Content Management (ECM) marketplace.
- Helping customers plan, develop and support content, knowledge, records and compliance management solutions for a wide range of industries and applications.

### SERVICE PROJECT HIGHLIGHTS

#### **Schlumberger/Cameron:**

- In the role of senior SME and Architect, I designed a complex internet-facing customer support portal solution in a highly secure cloud-hosted environment. The project included a mix of onshore and offshore resources and heavy coordination in a complex Enterprise IT setting. Technology stack included Angular, JavaScript, .Net, Web, REST and Open Text ECM Suite components.

#### **For A Large Retail Banking Institution**

- Designed & Developed RESTful Web Services and content ingestion solution (in Java/Spring) to integrate an Accounts Receivable service product into Content Server for document archiving and records management.

#### **NiSource**

#### **Columbia Pipeline Group Separation Project** *(Standup & Migration of Open Text ECM for a Corporate Spinoff)*

- Lead the Open Text ECM team in standing up new instances, extracting and migrating content from the NiSource corporate instance.

# Chris Morley

Software Development | Leader | Executive

cmorley@ecminnovation.com

M: (614) 439-7473

- Provided architectural, planning, design, software development, and execution services.

## **WMSDocs Application Development Project**

- Lead the technical design and software development for a document management solution integrating a legacy mainframe in-house work management system with Open Text Content Server and the corporate Records Management repository.
- Responsible for moving the project from waterfall to agile and grew user base from 900 to 3000.

## **North Carolina Department of Transportation**

- Provided architecture, planning and deployment expertise and services for their role out of the Open Text Content.
- Archived and Imaged products including the Capture Center Suite and Application Governance and Archiving for SharePoint.

**CAMERON:** *A “leading provider of flow equipment products, systems and services to worldwide oil, gas and process industries.”*

- Lead the effort to extract and migrate the users and data for one of this customer’s divisions from a 9.7.0 Livelink system to a new CS10 environment.

## **MIT Lincoln Laboratory** *(A Federally Funded Technology Research Program Provider)*

- Provided senior architecture and planning leadership services for the Laboratory’s migration to the Open Text ECM Suite from their existing knowledge management repository.

## **Pacer International, Inc.** *(Transportation & Logistics)*

- Designed, coordinated (with multiple vendors and offshore resources) and helped implement a document management and imaging software solution to be leveraged by and integrated into several mission critical application systems.

## **Murphy Oil** *(Energy)*

- Provided architecture planning and rollout advice supporting a complex international deployment of
- Open Text’s Livelink ECM suite.

## **Limited Brands** *(Apparel & Beauty)*

- Lead the planning, deployment, and support of their corporate Livelink ECM solution as well as the design, development and roll-out of custom content solutions.

## **GE Transportation** *(Aircraft Engine Manufacturing)*

- Responsible for security and architecture audits, analysis, and general mentoring for their Livelink deployment supporting engineering operations.

## **Open Text, Inc.**

**2003 – 2006**

### **Director Program Management**

Open Text (OTEX) is a public commercial enterprise software provider and the consensus worldwide leader among independent Enterprise Content Management (ECM) system vendors. Livelink (the flagship product) was deployed to millions of users in thousands of the world's largest corporations, across a broad array of industries as a document, knowledge, records and compliance management solution.

- Responsible for the full lifecycle of Livelink releases.
- Directed the efforts of ≈200 software development professionals distributed across six (6) locations throughout North America and Europe.
- Delivered releases on-time, on budget with exceptional content and quality.
- Presided over three major releases of Livelink and its associated modules and components including the first Unicode version and a complete replacement of the full-text search engine.
- Presided over the development and initial release of Open Text's four Email Management, Monitoring and Discovery solutions which were the first fully integrated products between the Livelink ECM and the IXOS (an acquired company) archive product lines.
- Responsible for leading organizational and process changes that, for the first time, produced fully coordinated Livelink and optional module releases; coordinating production from the six disparate software development sites (from acquisitions) across North American and Europe.
- Responsible for leading process changes that incorporated Agile software development methodologies into the SDLC of all sites.
- Participated in due-diligence and analysis of numerous acquisitions; performing technology, organizational and methodology assessments.

## **Open Text, Inc.**

**1999 - 2003**

### **Director, Product Development**

After Information Dimension's acquisition by Open Text, promoted to senior software development executive for the Dublin, Ohio site. Along with close collaboration with product management and strategic planning, heavily involved in the day to day design, architecture, project management, implementation and customer support activities for the products supported in Dublin.

- Senior software development executive for the Dublin, Ohio site responsible for budget and management responsibilities for ≈50 staff of all software development disciplines.
- Responsible for keeping site's expenses consistently under budget, projects and releases consistently on time and within budget.
- Responsible for all software development and quality assurance activities, packaging and technical maintenance of the BASIS & TechLib product lines which contributed \$25 million dollars in revenue to the business.
- Responsible for negotiating and maintaining 3rd party vendor relationships and licensing for software embedded in our products.
- Successfully negotiated the transfer of responsibilities for key Livelink components/modules to Dublin, OH site such as the API (LAPI), Workflow, Forms and the Portal. Prevented local layoffs and established a reputation for quality resources and processes within the broader development organization.
- Tightly integrated QA staff and functions, creating cross-discipline project assignments, and promoting a culture where everyone was responsible for quality from day one.

| <b>Independent Software Services, Inc.<br/>Owner/Independent Consultant</b>  | <b>1986 – 1996</b> |
| <b>Informatics General Corp. (aka Sterling Software &amp; Sterling Commerce)<br/>Principal Application Developer</b> | <b>1981 – 1985</b> |

## SOFTWARE DEVELOPMENT PRACTICE & TECHNOLOGY STRENGTH KEYWORDS

Full Stack, Web, Mobile, Desktop, Azure, Agile, TDD, C#, Java, C++, JavaScript, HTML, CSS3, SQL, NodeJS, .Net, .Net Core, ASP.Net MVC (Razor), Spring, Spring MVC, JQuery, Bootstrap, AngularJS, TypeScript, RESTful Services, SOAP, WCF, Xamarin, Xamarin Forms, WPF, XAML, Entity Framework, Spring JPA, Windows, MacOS, Linux, iOS, Android, SQL Server, SQL Lite, NoSQL, Oracle, Data Security & Encryption

**RECENT TECHNOLOGY FOCUS** (project & professional development) has solidified my expertise in the patterns, practices and tools associated with secure, scalable web and mobile cloud (Azure & AWS) applications. I have brought my Node JS / JavaScript oriented echosystem skills (Angular, React, Vue JS etc.) up to on par with the .Net and Java skills honed over prior decades.

As an architect, I am well versed in leveraging cloud vendor service products, and the effective application of micro-service and “serverless” patterns.

## EDUCATION

**The Ohio State University**

**Classes towards a Bachelor’s Degree**

*(Left mid-Junior year to take a full-time offer with Informatics)*
